RE: Rudd Construction, Inc.

Dear Art:

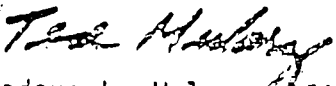

Our experience with Rudd Construction has been a good one and we would not hesitate to recommend this firm to a client in the future.

Rudd Construction was the General Contractor for the Basalt Municipal Center (City Hall) which was a project designed by our firm. We found Wayne Rudd and Max Goracke to be knowledgeable in construction methods and techniques as well as financially responsible. Their performance before, during and after construction was excellent and minor situations were resolved through excellent cooperation between Owner, Architect and Contractor. All Sub-Contractors and material suppliers were paid promptly and no liens were encountered.

I recommend Rudd Construction, Inc. very highly for licensure by the Town of Snowmass Village.

Sincerely

BENEDICT-MULARZ ASSOCIATES, P.C.
