Basalt, Colorado 81621

Dear Mark,

Jackie and I want to take this opportunity to thank Rudd Construction for the excellent job they did on the recent remodel of our Snowmass Village home.

In particular we would like to thank John Hawkins, the on site manager, for his expertise in all phases of the work and his ability to solve problems as they arose. John was not only a good supervisor but worked along with the subcontractors and direct labor to make sure everything was done correctly.

Working with Scott Duryea, Vice President, Project Manager was also a pleasure. Scott made sure all major subcontract work was competitively quoted to the most qualified sources. The monthly billing was accurate, easily understood and included backup for all charges. Scott also visited the site to keep track of the project schedule and to assist in some of the unforeseen problems we encountered during the remodel.

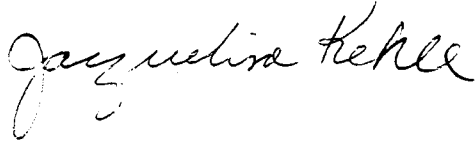

Finally we would like to thank you, Mark, for your personal involvement in our project and for visiting the site. We believe your concern and dedication to the work your firm undertakes permeates the entire organization and reflects in the work ethic and craftsmanship of your people.

We highly recommend Rudd Construction for anyone who is considering building or remodeling their home or business. Should we need any additional work on our home or decide to build a new home we would definitely choose Rudd Construction.

Sincerely,

Gerald W. Kehle
