Mr. Wayne Rudd, Rudd Construction
0132 Park Ave.
Basalt CO 81621

Dear Wayne:

It has been six months since the completion of the addition to our home in Aspen and we are still amazed. Amazed that the job came in on time and on budget; amazed that the entire process went so smoothly; amazed that no one can seem to tell where the addition starts and the original house ends.

I cannot tell you how each and every Rudd employee exemplified professionalism. They were so thoughtful concerning our being able to live here while the construction went on and took such care of our possessions. They were able to carry out the architects plans and were quick to offer suggestions of practical ways to improve on them.

Working with John Walker as Field Superintendent was a joy. He had an answer to every unexpected problem. His ability to work with our architect (who could have been difficult) made the process easy for us. He was able to listen to our dreams and desires and translate them into reality... most of the time with a result better than the one we expressed. His hands on skills and mastery of technique are evident in every detail of the addition. His supervision of your crew and all the subs was a lesson in management and organizational skills.

Scott Duryea as Project Manager explained all the costs and kept us well informed of any options as the addition progressed. His monthly reports were easy to understand and detailed. Even though we were unavailable for several weeks in the middle of construction, we were comfortable that Scott and John would make the same decisions we would have made.

We really enjoyed being on-site for a lot of the building process. It was a joy watching Pete work. The care and craftsmanship were something to behold.

Everyone concerned especially Vic who kept the site neat and clean was a pleasure to have working on our home.

We would not hesitate to use your firm again and to recommend them to friends.
Thank you for a job well done.

Sincerely,

Jack and Lecie Resneck
